

TIRAR™

Contemporary, solid timber and
stone architectural door furniture

“The door handle
is the handshake
of the building”

Juhani Pallasmaa. Finnish architect, educator & writer.

Bespoke liquid metal overlay

Subject of registration of design

As an interior designer of long standing, with a reputation for design resolution, Felice Carlino was searching for a full-timber door pull for a project that he was designing.

“Everything I found was a combination of timber and metal, which didn’t fulfill the brief visually and neither did they feel comfortable in the hand”. - Felice Carlino

As a result he decided to design his own.

His research led to the design of a handle that intuitively responds to the mechanical workings of the fingers and hands. “Fingers are made up of three joints that wrap themselves around the grip,” Carlino explains, “So we crafted a taper and radius edges so the door pull and lever would sit, easily and comfortably, in the grip of the hand – whatever the hand size.”

Prototyping and development led to a product that he was finally happy to put into small local production in Australia, and then expand. The range now includes pull handles, lever handles, universal design lever handles and towel rails as well as custom finishes that take the product to a bespoke level.

“In a complex world sometimes a simple act, an engagement through touch and the reassurance of contact with a solid natural material, carefully crafted and finished, is one of life’s small but significant pleasures.” - Felice Carlino

The new Qantas Chairman's Lounge in Brisbane is a masterpiece, a showcase of the best of Australian design.

TIRAR was appointed to provide the bespoke, solid timber door furniture, designing a selection of elegant levers and door pulls crafted from fine Australian and imported wood.

They create a stunning first impression and hint at the luxury awaiting those fortunate enough to be invited in.

Wood paneling and marble are key features of the Lounge and the exquisite Tirar door furniture is perfectly at home in the refined environment.

Door pulls available in 1200mm, 900mm and 600mm

The TIRAR range of door pulls, door levers, coat hooks, cabinet pulls, and cupboard handles can be created in a range of exotic timbers to complement and enhance any special project you have planned.

Standard Levers

Ergonomics is at the heart of TIRAR door furniture; the door levers have been designed to comfortably fit the grip of your hand.

The softness of the radius edges are designed to accommodate the largest and smallest hands. The sensuous feel of the timber is as important as the more functional aspects.

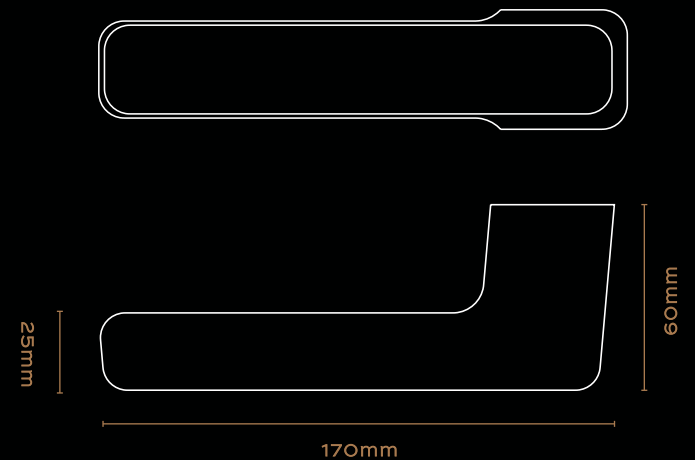

Levers come in three standard timber finishes and be created in a range of exotic timbers to complement and enhance any special project requirements.

Timber is carefully selected and sourced from certified timber suppliers.

Sealed in marine grade sealer and finished in marine grade clear top coat satin finish.

TUI. Vietnamese, for ‘pocket’

Like a pocket, TUI is practical and invites interaction. It’s an apt metaphor for this delightful piece of furniture created specifically for cavity doors.

The classic design sits comfortably with the broadest range of architectural styles.

Functionality and ease of use remain the pivotal assets of TUI; but how reassuring it is to find such utilitarian needs so beautifully packaged.

TUI frameless glass sliding door pulls come in two standard timber finishes and can be created in a range of exotic timbers to complement and enhance any special project requirements.

Timber is carefully selected and sourced from certified timber suppliers.

Sealed in marine grade sealer and finished in marine grade clear top coat satin finish.

Your vision, new horizons

TUI sliding cavity door pulls are available to suit a range of cabinet and wardrobe applications.

Realise your vision down to the finest detail; sliding cavity doors offer a streamlined solution for every situation they're installed. The simple, understated elegance of TUI has been designed to enhance cabinets, cupboards and wardrobes. So your vision can be expressed across every aspect of the project.

TUI offers a fully resolved edge detail treatment; beautifully sculpted, the edge is integral to the overall design, not an afterthought. An approach to detail that no doubt mirrors your own.

TUI Serratura

An elegant solution to a practical requirement; integrated into the beautiful, natural wood environment of the Tui sliding door pull is a functional inclusion designed to add an additional element of serviceability; a bespoke serratura, or lock.

The simple design of the lock provides little clue to the mechanical workings concealed beneath. The eye remains focused on the clean lines and organic shapes that invite further interaction, unencumbered by a need to investigate further.

Tui Serratura is the fitting compagna of Tui, a secure and tactile guardian that elevates and celebrates the humble lock.

KORKKI

The perfect collaboration between functional and beautiful; a synthesis of arts in a simple form.

Executed in a selection of sustainable, solid timbers and natural stone, the organic lines flow smoothly around the perimeter of the design, seducing with its lustrous colour and tactile warmth. A classic shape, beautifully refined and detailed.

Korkki is a delightful, if not unexpected addition to the TIRAR range; unexpected in the sense that TIRAR designs will always express a sensuality that encourages interaction. KORKKI demands to be touched; the door furniture embraces the hand elegantly, the hooks invite you to drape a towel.

KORKKI Range

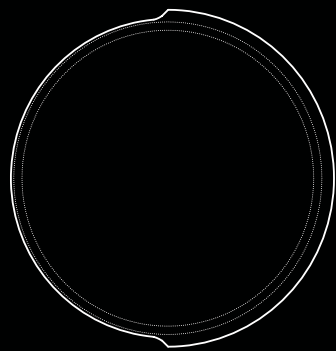

Uncomplicated and classic, the KORKKI range is designed to be used as door pulls, cabinet pulls, cupboard handles and coat or towel hooks.

A functional and handsome selection that elevate their utilitarian task.

Beauty of natural stone

Is anything so utilitarian that it
should be denied the opportunity
to be expressed in the allure
of natural stone?

We believe that beauty and elegance are as important as form and function.

Door architecture furniture in stone feels luxuriously smooth in the hand and invokes a re-assuring honesty that only natural materials can.

The image shows two cabinet pulls resting on a dark, textured surface that resembles stone or sand. The pull in the upper left is dark and cylindrical. The pull in the lower right is light-colored with a marbled pattern and has a more complex, rectangular shape. The text 'Mela Stone Cabinet Pulls' is overlaid in white on the right side of the image.

Mela Stone Cabinet Pulls

Calacatta Marble

Fontainebleau Stone

Mela Stone Cabinet Pulls

A contemporary take on an ageless design in stone. The classic lines have been reinterpreted to accommodate the unexpected new material.

The result is sensual and elegant; but is a handle designed for a cupboard door deserving of such attention?

Available in two sizes, 180mm and 230mm, and two finishes.

Bespoke stone finishes available on request and suitability.
